About me

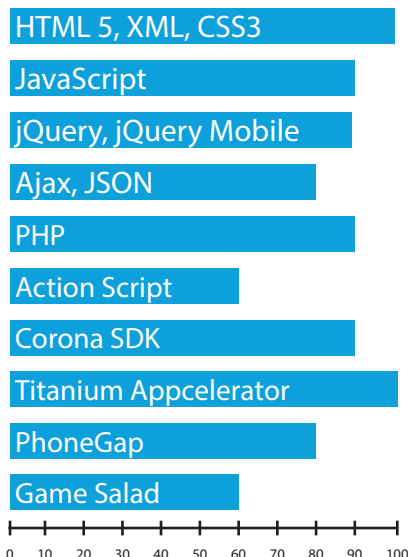

With a total experience of more than 5 years and having worked on more than 20 projects of development, I am thorough with programming techniques and requirements with the help of the languages mentioned below. With all the expertise bundled up and evolved leadership skills, I believe that I can successfully handle a team of programmers and effectively get the desired output. Over these years I have worked on different web sites, business applications, database applications, and gaming platform development.

Professional Skills

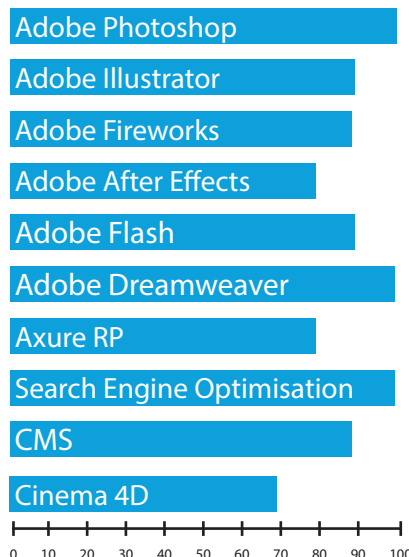

- Excellent interpersonal skills
- Excellent presentation and communication skills
- Excellent knowledge of programming languages, and its source codes
- Innovative ideas in designing of software
- Possess analytics and problem solving skills
- Excellent organization and management skills
- Capable to create source code for different projects
